

PITCH DECK

***Batangas Province Automated Garbage
Operations System for CENRO***

Bago. Baguhin. Batangas.

THE PHILIPPINES HAS A WASTE PROBLEM THAT HAS BEEN GROWING FOR 25 YEARS – AND IT IS GETTING WORSE.

(Philippine News Agency, 2025)

61,000

metric tons of solid waste

projected to exceed **23 million tons annually by 2025.**

(UNEP, 2024)

40%

How much urban waste generation has grown since 2000, with global waste on track to hit 3.8 billion tons by 2050.

(DENR/EMB, 2025)

86%

Share of LGUs with active waste management plans, yet collection systems are still broken and barangays still bury in uncollected trash.

WHAT IS THE PROBLEM?

3 failures. 42,000 barangays. Zero digital fix.

NO SCHEDULE VISIBILITY

- Residents have no reliable way to know when the garbage truck is coming.
- LGUs rely on Facebook posts, paper flyers, and word-of-mouth that fail every time a schedule changes.

NO REPORTING CHANNEL

- When a pickup is missed or waste overflows, there is no official way for a resident to report it. No ticket, no paper trail, no accountability, no follow-up.

NO DATA FOR LGUs

- Barangay officials and CENRO officers manage waste collection blind.
- No real-time route data, no compliance tracking, no DENR-ready reports without hours of manual work.

OUR SOLUTION

One app. Three users. One system that finally works.

NOTIFY

Push real-time garbage collection schedules directly to every registered resident the moment an LGU admin makes a change. No Facebook post needed.

REPORT

Let residents photograph waste problems with GPS tagging and submit them as tracked tickets.

- Every complaint gets a status and every status gets a notification.

REWARD

Credit eco-points to residents when collectors scan their QR code confirming correct segregation.

- Points are redeemable for DITO data packs, BATELEC bill credits, and partner vouchers.

ANALYZE

Give LGU officials a real-time dashboard showing collection rates, compliance trends, and exportable DENR-ready reports from one web-based admin panel.

MARKET VALIDATION

36%

Over a third of Filipino households

have no regular garbage collection service at all. They burn, dump, or throw waste into rivers instead.

(Social Weather Stations, 2023)

39%

of Philippine barangays

have access to a Materials Recovery Facility, despite every barangay being legally required to have one under RA 9003.

(Commission on Audit, 2023)

73.6%

of Filipinos are online.

CALABARZON has the highest mobile broadband adoption rate in the country. The residents who need this app are already on their phones.

(DataReportal, 2024; PSA, 2020)

MARKET SIZE

5.7 billion pesos. One region to start. Ten LGUs to prove it.

**42,046 BARANGAYS
NATIONWIDE**

₱5.7 Billion

Total market demand
for BAGO across the
Philippines.

**4,012 BARANGAYS
IN CALABARZON**

₱980 Million

The segment of the TAM
BAGO targets within a 3-
year window.

**10 LGU ACCOUNTS + 5,000
PREMIUM RESIDENTS**

₱37 Million

What we can capture in Year 1.

FEATURES

← QR CODE SEGREGATION VERIFICATION

- Each registered household receives a unique QR code. When a collector scans the code and confirms correct segregation, the resident's eco-points are credited automatically. The system records every scan as a compliance data point.

← LGU ANALYTICS DASHBOARD

- Barangay officials and CENRO officers access a real-time dashboard showing collection completion rates, report resolution times, and segregation compliance per barangay.

← PUSH NOTIFICATION ALERTS

- Every schedule change, report status update, and eco-point credit triggers an instant push notification to the relevant user. Residents stay informed. Collectors get route updates. LGU admins confirm deliveries in real time.

FEATURES

REAL-TIME SCHEDULE VIEWING

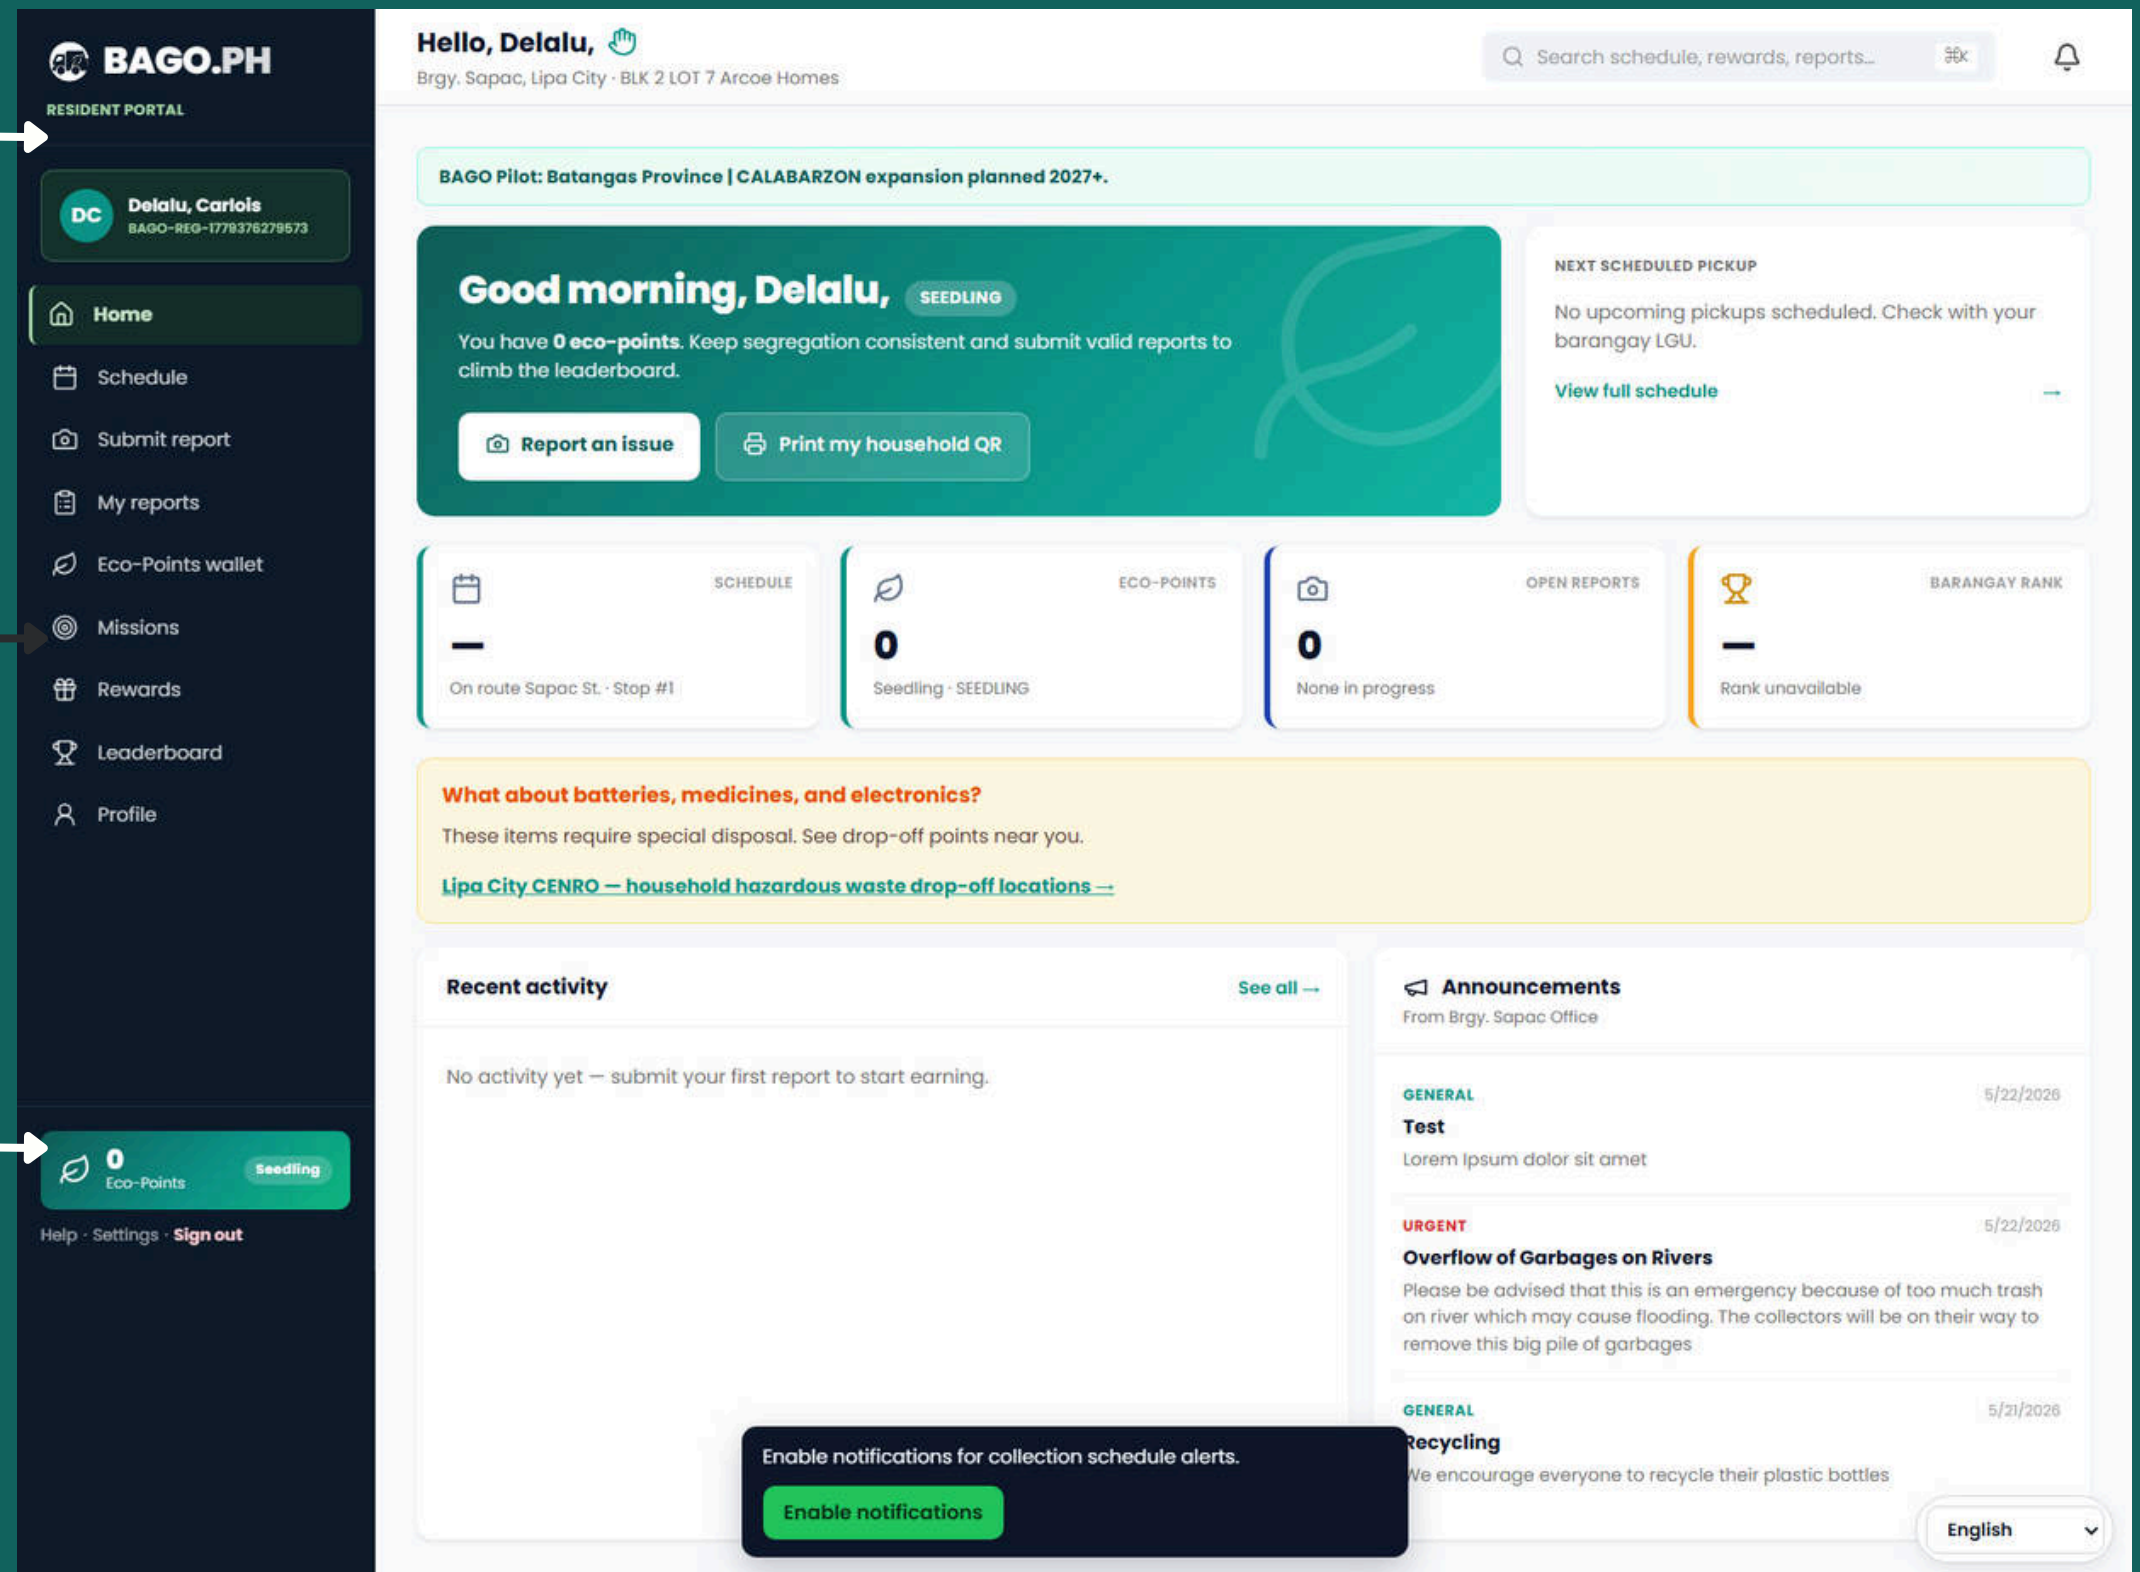

- LGU admins update garbage collection schedules directly from the dashboard. Registered residents receive the updated schedule on their phone within seconds.

PHOTO-BASED ISSUE REPORTING

- Residents take a photo of a waste problem and submit it through the app. The photo is automatically tagged with the GPS location and a timestamp.

GAMIFIED ECO-POINTS SYSTEM

- Residents earn eco-points for correct waste segregation, verified by the collector through a QR code scan. Points are stored in an in-app wallet and redeemed for credits, mobile data, grocery vouchers, and utility bill discounts.

BUSINESS MODEL

We will have a mixed revenue model – freemium for residents + tiered B2G subscriptions for LGUs

5,000

Residents + 10% premium conversion
(Month 12 target)

₱74,500

Average MRR based on Month 12 launch projections

₱750,000

Revenue Projected by the end of Year 1

COMPETITION

We are replacing nothing and THAT is the problem.

FULL SYSTEM INCLUDING RESIDENT, LGU AND ANALYTICS

i-WAMS, DENR National System ●
No resident-facing mobile app. No gamification. Desktop-only. Not real-time.

MANUAL
AND
OFFLINE

Facebook Groups and Messenger ●
Zero accountability, no data, no ticketing.
Fails when admins go inactive.

● **Paper Notices and SMS Broadcasts**
One-way only. Cannot receive reports,
export data, or track compliance.

● **BAGO**
The only localized platform combining real-time scheduling, GPS photo reporting, gamified rewards, LGU analytics, and RA 9003 compliance reporting.

DIGITAL
AND
ONLINE

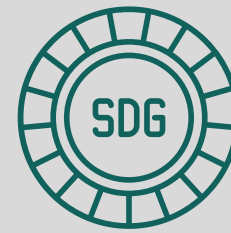

RESIDENT-FACING ONLY

6 REASONS WE WIN AND 3 OF THEM CANNOT BE COPIED QUICKLY.

FIRST MOVER

No combined app in
PH.

SDG 11 AND 12 ALIGNMENT

UN SDG support:
ESG funding

GCASH AND MAYA INTEGRATION

93M Filipinos use
daily.

UB CITEC BACKING

Academic credibility
and network

STRATEGIC ALLIANCES

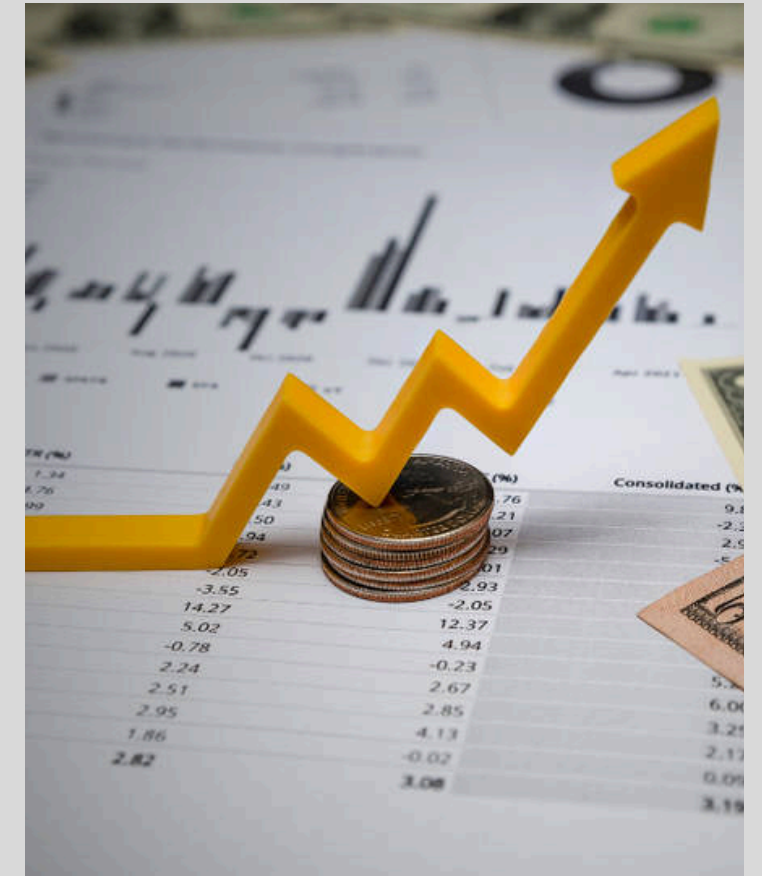

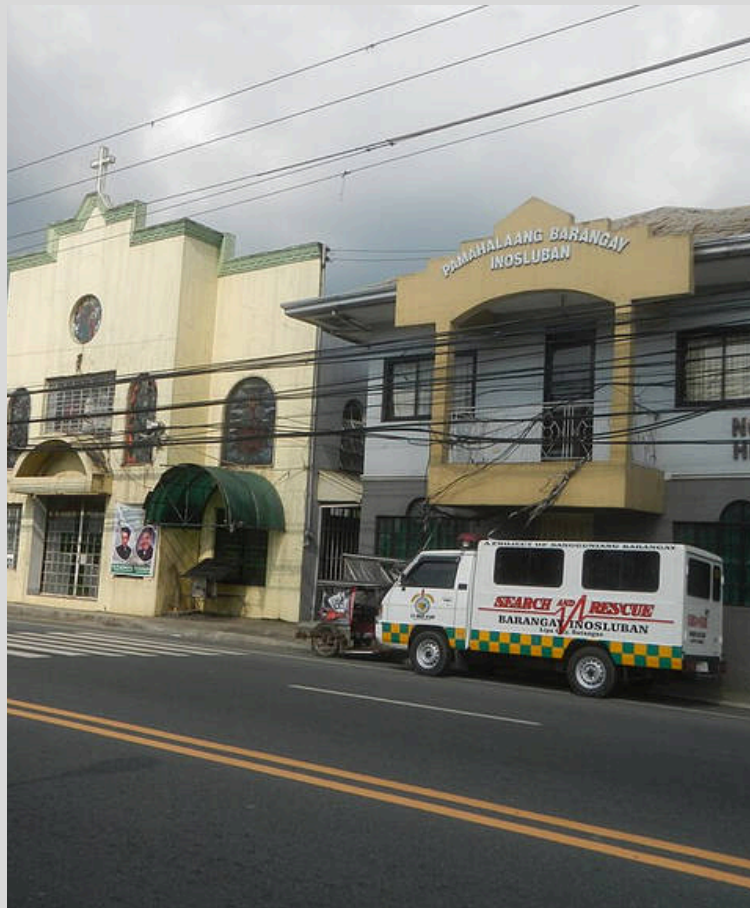

BATELEC, Lipa Water,
Telecommunications,
Local Markets

RA 9003 ALIGNMENT

Meets legal
obligations for LGUs.

GO-TO-MARKET STRATEGY

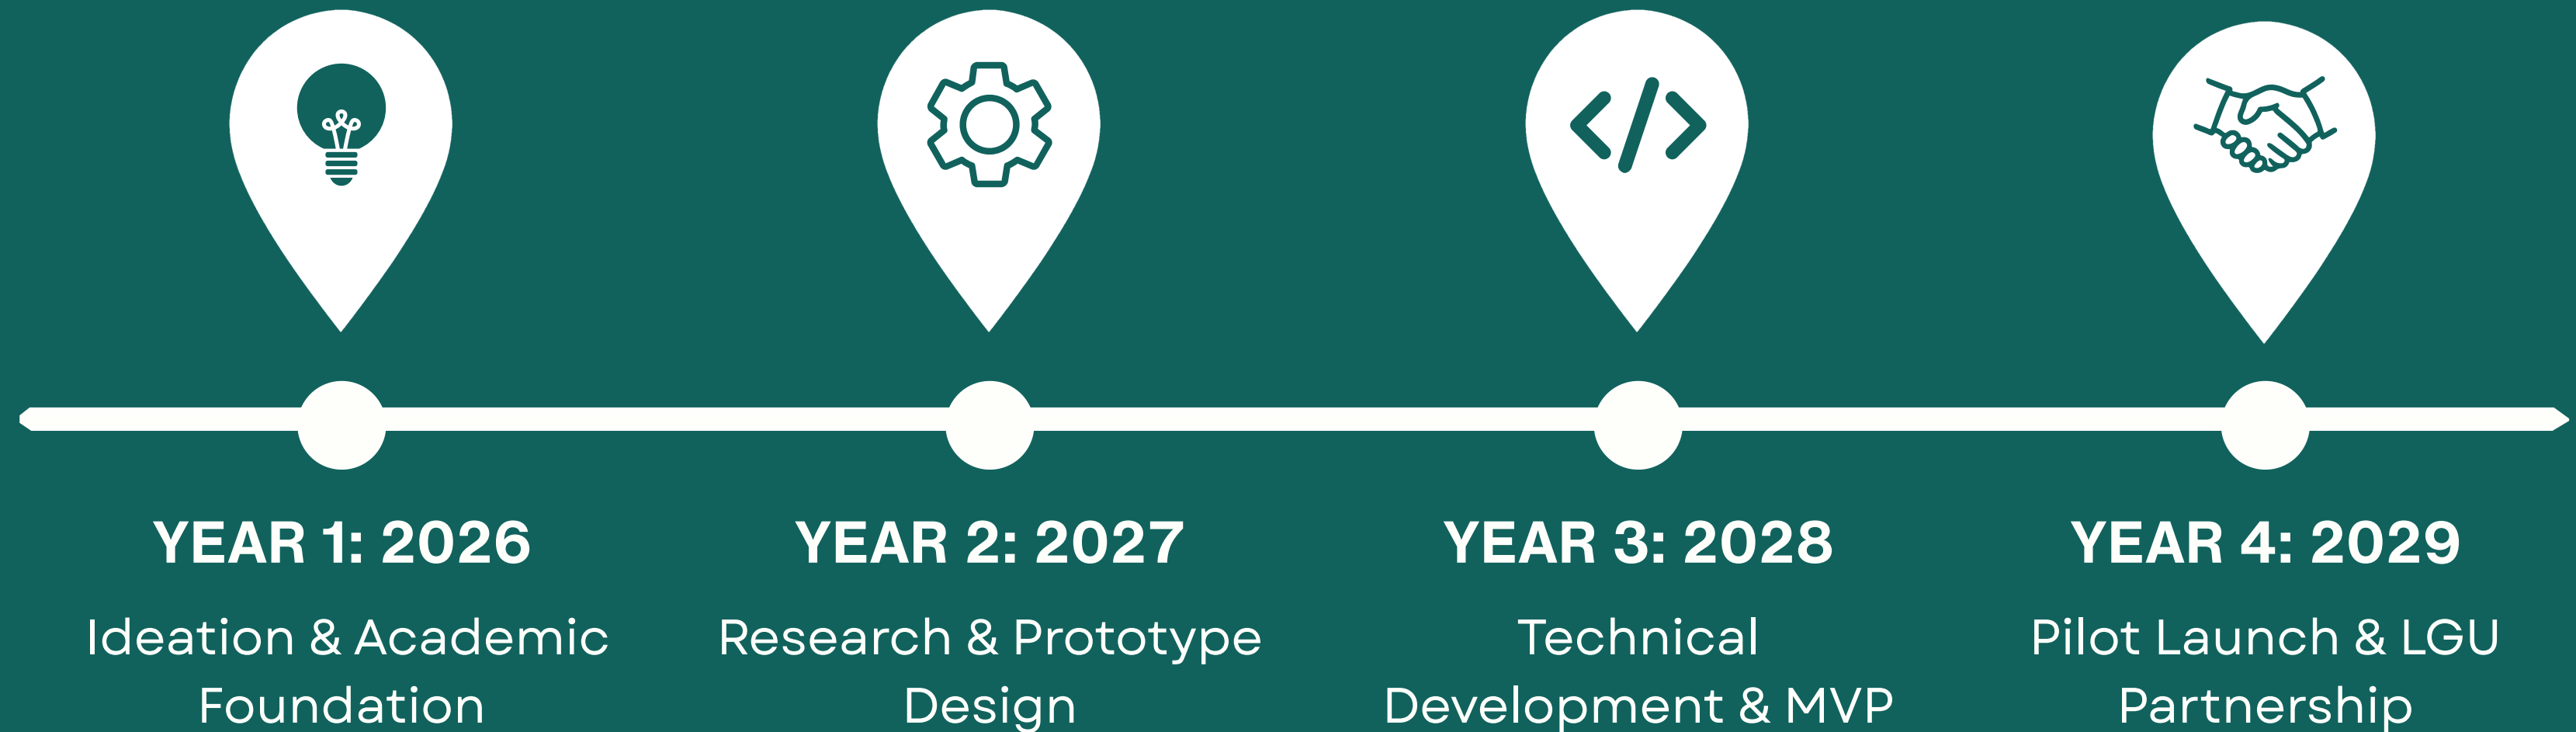

Phase 1:
Hyper Local Pilot
Month 1-3

Phase 2:
MVP and internal testing
Month 3-4

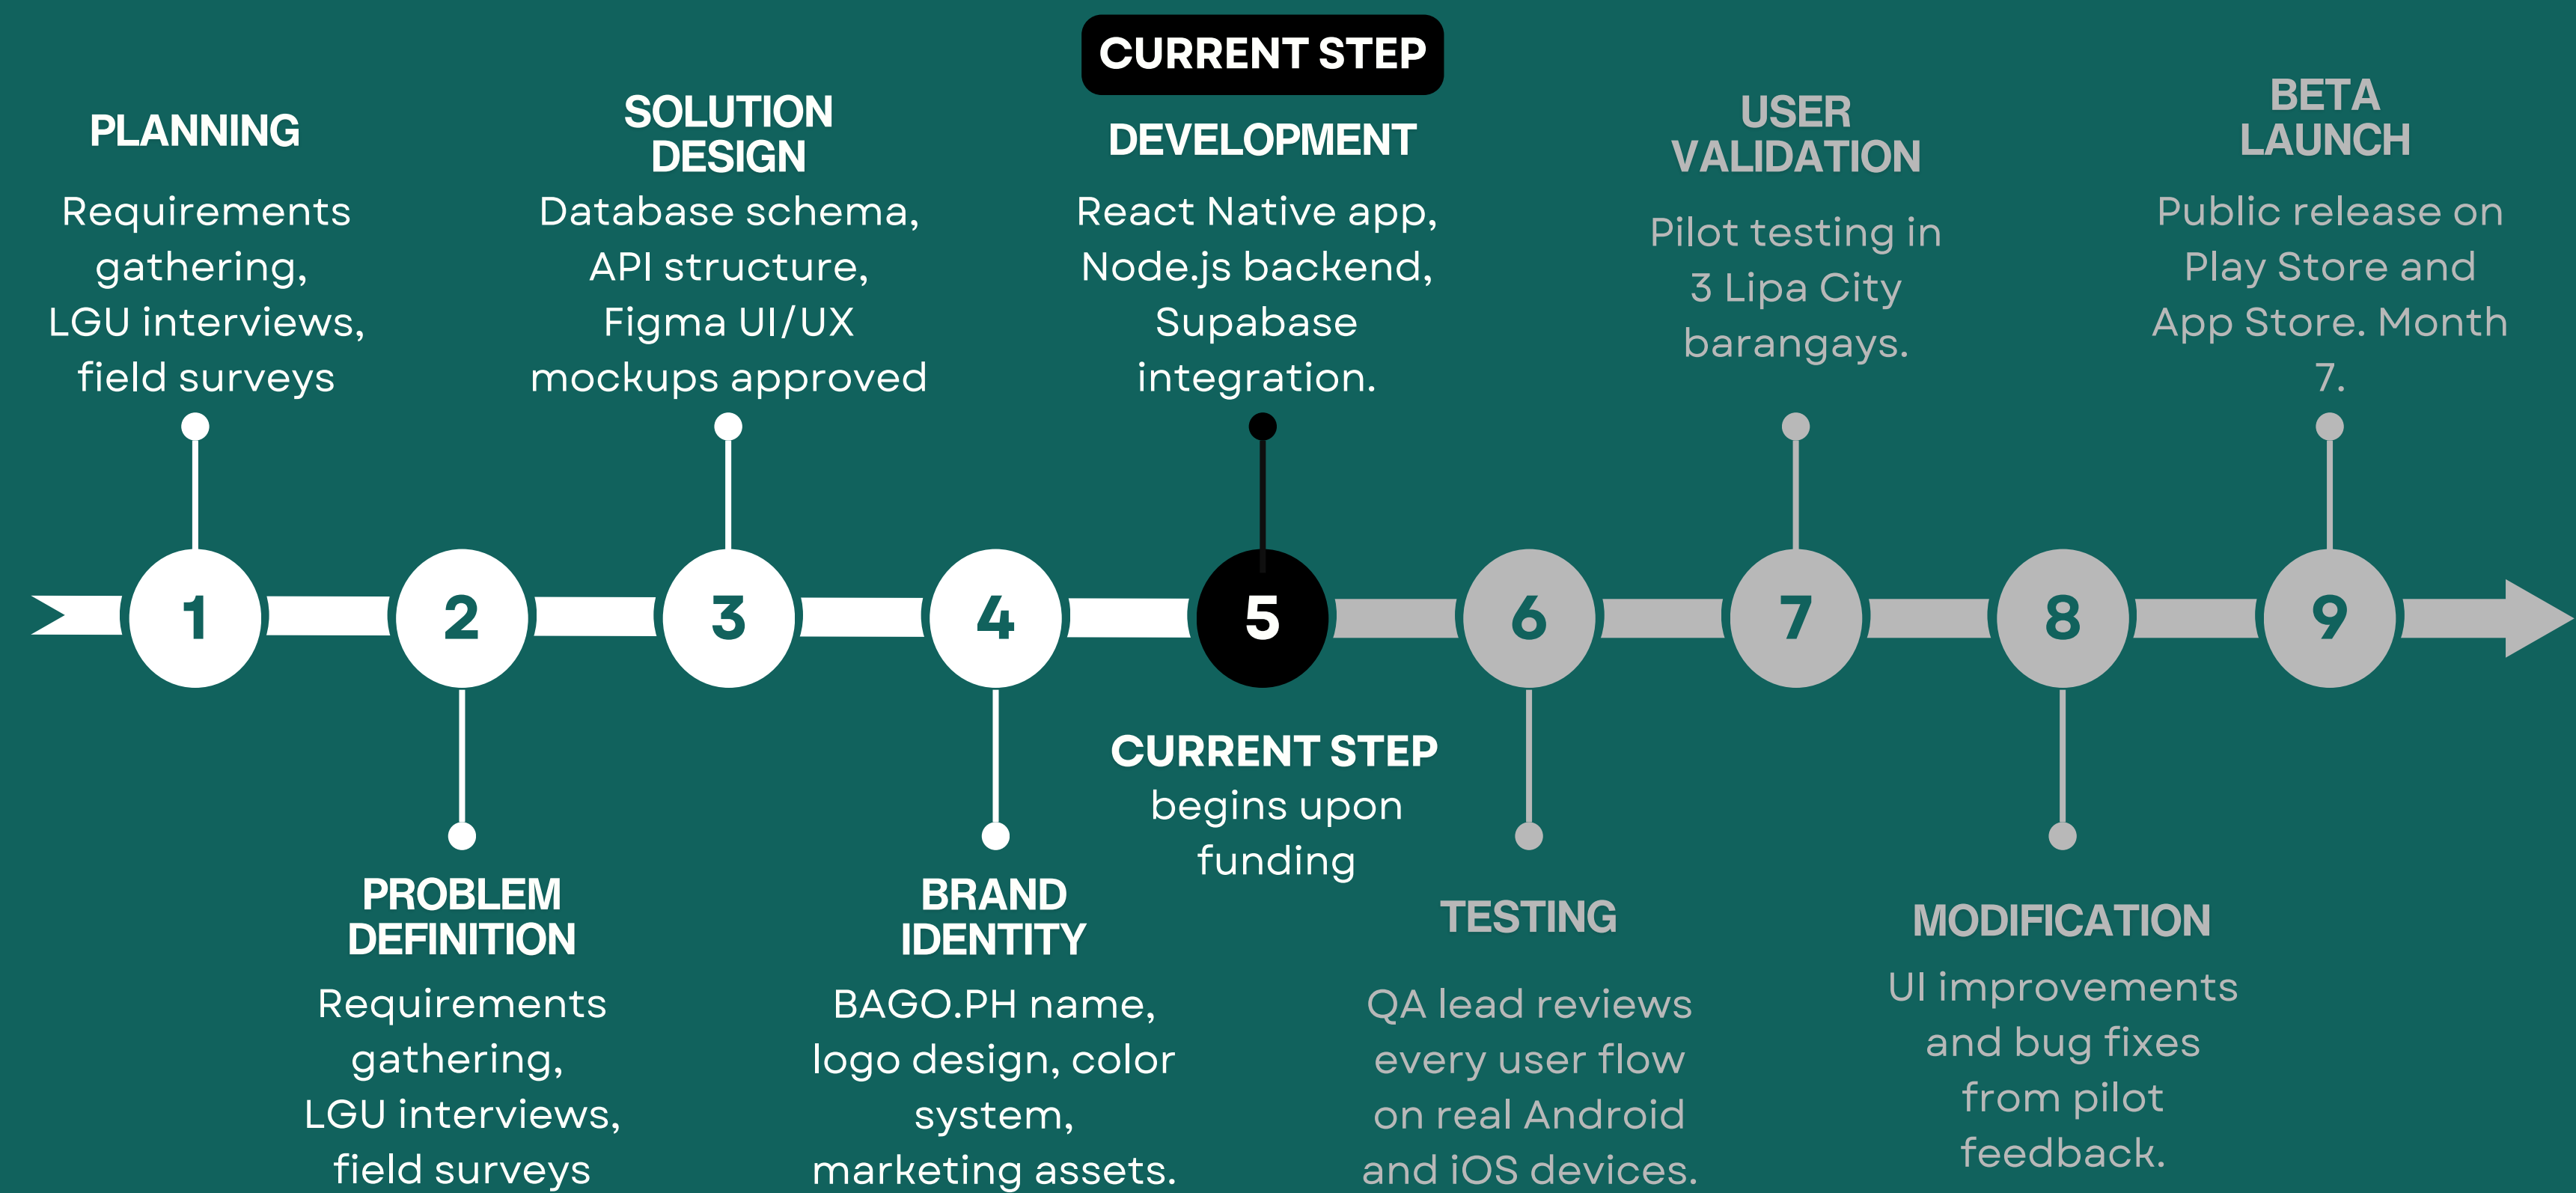

Phase 3:
LGU expansion
Month 4-8

Phase 4:
Revenue and Growth
Month 9-12

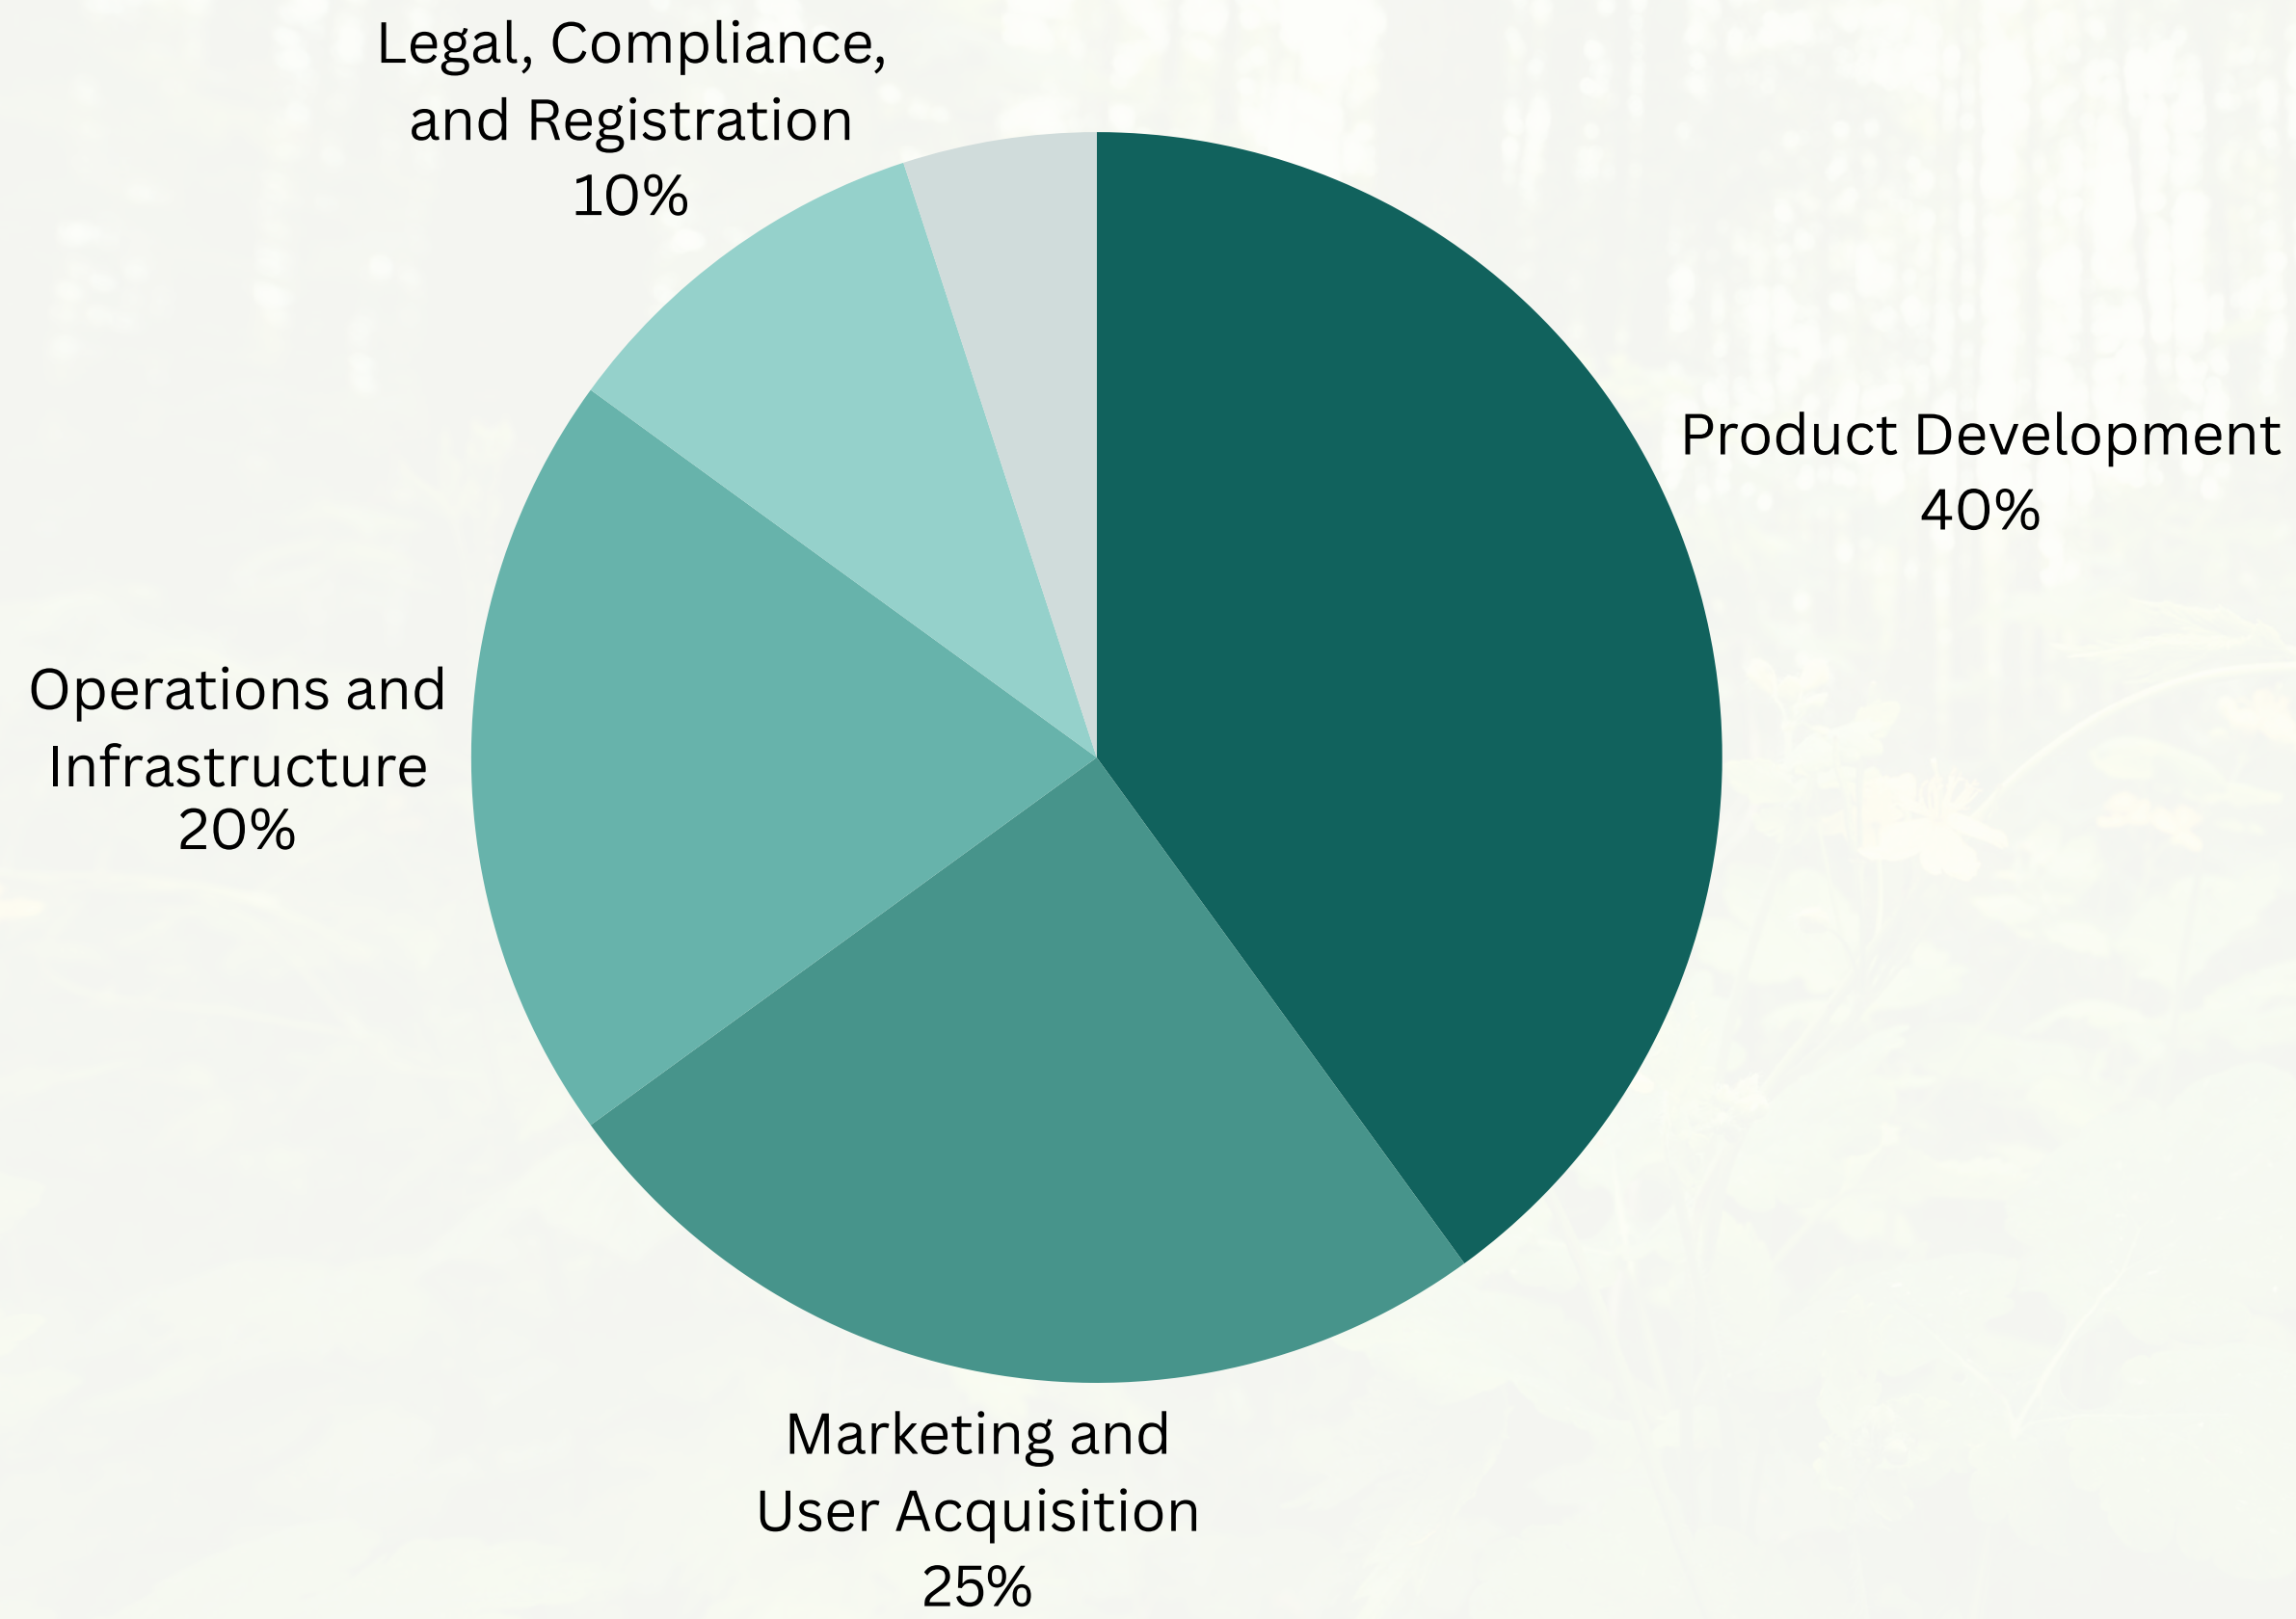

ROAD MAP

FROM RESEARCH TO REAL BARANGAYS. HERE IS EXACTLY WHERE WE ARE.

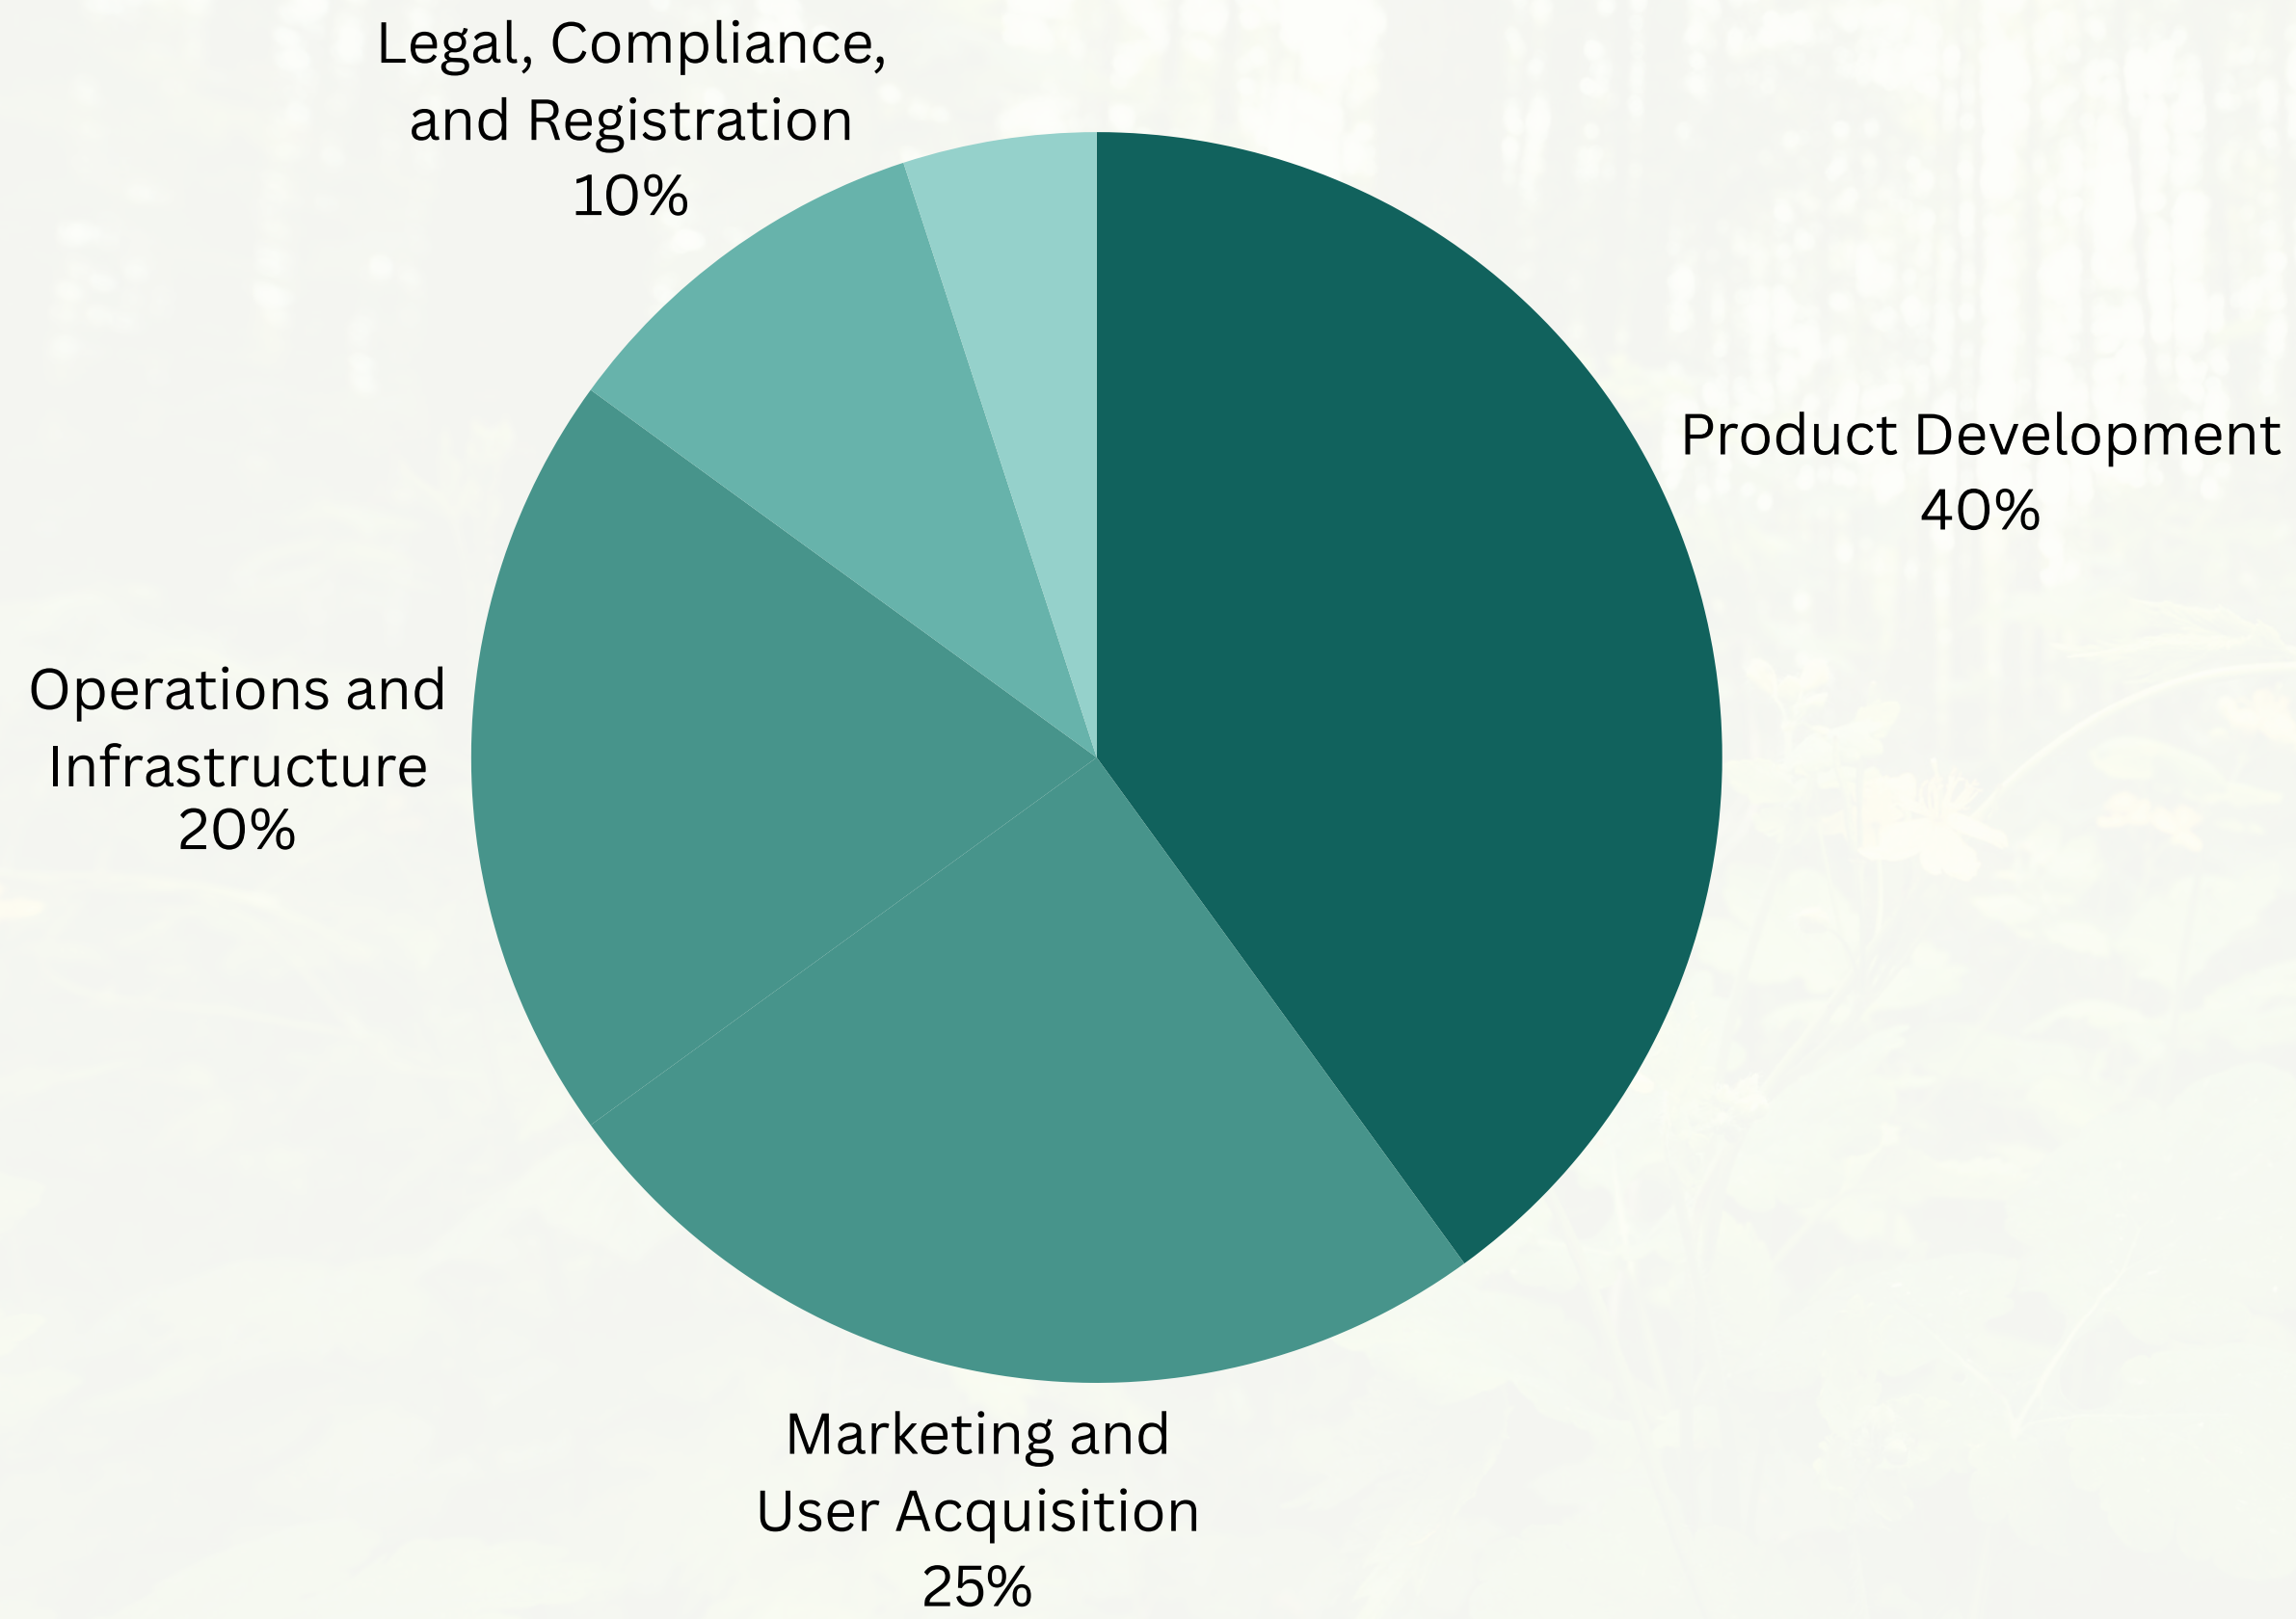

1,800,000 PESOS. EVERY PESO HAS A JOB.

- 1 PRODUCT DEVELOPMENT: 40% / 720,000**
Developer salaries for 6 months and API integrations (GCash, Maya, Google Maps, FCM, Supabase Pro).
- 2 MARKETING AND USER ACQUISITION: 25% / 450,000 PESOS**
Developer salaries for 6 months and API integrations (GCash, Maya, Google Maps, FCM, Supabase Pro).
- 3 OPERATIONS AND INFRASTRUCTURE: 20% / 360,000 PESOS**
Developer salaries for 6 months and API integrations (GCash, Maya, Google Maps, FCM, Supabase Pro).

1,800,000 PESOS. EVERY PESO HAS A JOB.

4 **LEGAL, COMPLIANCE, AND REGISTRATION: 10% / 180,000 PESOS**
SEC/DTI registration, Privacy Policy, RA 10173 compliance architecture, partnership agreement review.

5 **CONTINGENCY RESERVE: 5% / 90,000 PESOS**
API overruns, post-launch emergency fixes, unexpected pilot expansion costs.

TOTAL : 1,800,000 PESOS
